SUMMARY

A .NET Developer with almost 3+ years of experience in backend development using ASP.NET CORE, ADO.NET, Dapper, EF Core, and SQL Server, to build efficient and scalable backend systems. I am well-versed in Database design, and RESTful API's. Through out my experiences I also gained frontend development skills including HTML, CSS, JavaScript, and JQuery and also by developing a SaaS web application using React (TypeScript) and TailwindCSS.

EXPERIENCE

INFOR PSSC INC
03/2024 – present

Software Engineer (MID)

- Learn and use in-house framework called Smartware4
- Gained novice knowledge in using Ext JS and OData (used in my daily task/tickets)

SOURCEPASS
04/2023 – 03/2024

C# NET/SQL Developer

- Participated in team discussion on how to implement CLEAN Architecture and using Dapper
- Involved in setting up Payment module and integration of Stripe on backend
- Hands-on experience in using Asana for task/work management
- Creation of tables, procedures, triggers, and user-defined table types using SQL Server
- Responsible for developing Icon endpoint for existing SaaS project (mobile/web) by using Azure Blob as the storage of pre-defined icons created by Designers and returning public/accessible Icon URL
- Prepared documentation on third party integration Stripe, and user guide for complex API for mobile team

UPWORK CLIENT-BASED (PART-TIME)
09/2023 – 11/2023

C# Backend Developer

- Self learned with client including MicroServicing, Azure Function, Test Driven Development, Unit of work, and EntityFramework with EF Core Powertools
- Played a daily role in implementation of business requirements to API endpoints with Test integration either Unit or Integration test

MICROSOURCE INC
01/2021 – 03/2023

Software Engineer

- Hands on experience in using UIPath in Automating process eg; web scraping and testing
- Assigned in Data analyst/validation role using Excel including PIVOT in analyzing Data discrepancy and creation of Report for offshore client
- Acted as support role in Data Warehouse and gained knowledge in Data architectural pattern including Data Vault and Data Lake.
- Hands on experience in background task development that are responsible for generating JSON/CSV files from SOAP and REST services in which this files are parsed in Snowflake and act as Data Source for Wherescape RED.
- Responsible for developing a Data Insights SaaS web application using JQuery and NET Core with ADO.NET and soon switched from JQUERY to React(TypeScript) and has been commercialized as Dataradar.io
